## **SYLLABUS**

## 1. Data about the program of study

1.1	Institution	Technical University of Cluj-Napoca
1.2	Faculty	Faculty of Electrical Engineering
1.3	Department	Electrotechnics and Measurements
1.4	Field of study	Electrical Engineering
1.5	Cycle of study	Bachelor of Science
1.6	Program of study/ Qualification	Electrical System Cluj-Napoca in English language
1.7	Form of education	Full time
1.8	Subject code	12

# 2. Data about the subject

2.1	Subject name				Computer programming and programming languages II		
2.2	Course responsible/ lecturer			Conf.dr.eng. Grindei Violeta Laura			
2.3	Teachers in charge of Seminars/ Laboratory/ Project			Lect. dr.eng. Constantinescu Claudia			
2.4 Y	2.4 Year of study 1 2.5 Semester 2		2	2.6 Type of assessment ( <i>E – exam, C – colloquium,</i> <i>V – verification</i> )	E		
2.7 Subject <i>DF – fundamental, DD – ir</i>		DD – i	n the field, DS – specialty, DC – complementary	DF			
cate	category DI – compulsory, DO – ele		0 – ele	ective, Dfac – optional	DI		

# 3. Estimated total time

3.1 Number of hours per week:	4	of which	3.2 Course	2	3.3 Seminar		3.3 Laboratory	2	3.3 Project	
3.2 Total hours per semester	125	of which	3.5 Course	28	3.6 Seminar		3.6 Laboratory	28	3.6 Project	
3.7 Individual study:										
(a) Manual, lecture material and notes, bibliography							2	4		
(b) Supplementary study in the library, online and in the field							1	7		
(c) Preparation for seminars/laboratory works, homework, reports, portfolios, essays							1	8		
(d) Tutoring							(	ĵ		
(e) Exams and tests	(e) Exams and tests							4	1	
(f) Other activities						(	)			
3.8 Total hours of individual study [sum (3.7(a) to 3.7(f))] 69										
3.9 Total hours per semester [sum of 3.4 and 3.8] 125										
3.10 Number of credit points 5										

# 4. Prerequisites (where applicable)

4	1 Curriculum	Completing PCLP I
4	2 Competences	Competences from PCLP I

# 5. Requirements (where appropriate)

5.1	For the course	Projector
5.2	For the applications	Computers room

## 6. Specific competences

	•	ability to identify, formulate and solve engineering problems in a system approach
nal ces	•	ability to apply engineering knowledge, engineering sciences, and applied computer
sior tend		science.
Professional	•	ability to use software products for monitoring and controlling processes specific to
Pre		energy engineering while ensuring the safety of personnel in electrical installations of any
		level.
es	•	Flexibility in approaching and practically applying the latest technologies in the areas of
Cross competences		expertise undertaken.
Cross	•	ability to work in interdisciplinary and multidisciplinary teams, to communicate
corr		effectively, and to understand professional and ethical responsibilities.

# 7. Discipline objectives (based on specific competencies acquired)

		The use of advanced programming languages and the acquisition
7.1	General objective	of basic skills in designing and implementing programs in
		C/C++/Python in Electrical Engineering field.
		The student must be able to design and implement complex
7.2	Specific objectives	applications to solve problems in the field of energy
		engineering using C/C++/Python programming languages.

### 8. Contents

8.1.	Course (Lectures)	Number of hours	Teaching methods	Additional remarks
1	Pointers. Pointers to arrays. Arrays of pointers.	2		
	Pointers to pointers. Pointers to functions. Functions			
	with pointer arguments.			
2	Dynamic memory allocation. Dynamic allocation	2		
	functions.			
3	Command line. Arguments of the main() function.	2		
4	Defining, declaring, and accessing elements of	2		
	structures. Structures and functions. Pointers to			
	structures. Arrays of structures.Sorting algorithms.			Quiz
5	Defining, declaring, and accessing elements of	2	ppt tutorials	evaluation
	unions, enumerations, bit fields, lists		ppt tutoriais	
	(implementation of specific list types).			tests
6	Defining and using file operations in C.	2		
7	Streams cin and cout.	2		
8	Structuring C/C++ programs into modules.			
9	Differences between C/C++. C++ Libraries. Standard	2		
	Template Library in C++: algorithms (for sorting,			
	selection, and binary search of data stored in			
	containers), containers: vector, list, map, set, and			
	stack, iterators: forward_iterator,			

	bidirectional_iterator, and random_access_iterator,			
	functors-function objects, adaptors.			
10	OOP: Defining objects, classes, and methods used in	2		
	object-oriented programming. The concept of			
	inheritance. Classes and friend functions. Common			
	class functions (constructor, destructor).			
11	File operations in C++.	2		
12	Mathematical applications implemented in C/C++ in	2		
	the field of electrical engineering: polynomials,			
	polynomial differentiation, Taylor series expansions			
	of trigonometric functions, applications with mean			
	values, effective values, mean absolute deviation			
	values, error calculation, integral applications.			
13	Applications in C/C++ for solving electrical circuit	2		
	problems.			
14	Introduction to Python. Python applications in	2		
	electrical engineering: graphical representation of 2D			
	and 3D numerical data, animated graphs,			
	waveforms.

# 9. Alignment of course content with expectations of the epistemic community, professional associations, and representative employers in the field

The content of the course is in line with what is taught in other Electrical Engineering faculties, both within the other university centres in the country and abroad.

### 10. Assessment

Activity type	10.1 Assessment criteria	10.2 Assessment methods	10.3 Weight in the final grade (%)
10.4 Course	The level of theoretical knowledge accumulation is tested through a written test with questions regarding the interpretation of C/C++ code sequences and the writing of a C/C++ program to solve an electrical engineering problem.	Multiple-choice test + one C/C++ code to solve an electrical engineering problem.	50%
10.5 Laboratory	The level of practical knowledge accumulated during labotatories is tested through on line tests	9 multiple choice on line tests in Teams	50%
10.5 Project			

10.6 Minimum standard of performance:

# Final mark =(theoretical test mark +average of 9 laboratory tests)/2=minimum 5

Date of completion	Lecturers	Title/ Surname/ Name:	Signature
September 2024	Course	Conf. dr. ing. Violeta Laura GRINDEI	
	Applications Seminar/	Conf. dr. ing. Violeta Laura GRINDEI	
	Laboratory/ Project	s.l.dr. ing.Claudia Constantinescu	

Date	of approva	l in the	ETHM	Department	Council

#### Head of Department: Prof. Eng. MICU Dan Doru, PhD

September 2024

Date of approval in the Faculty of Electrical Engineering Council

Dean: Assoc. Prof. Eng. CZIKER Andrei, PhD
